Final Project

COVID19

- Selected Topic
  - COVID19

- Reason for the selection of the topic
  - Global pandemics might become frequent in future. Therefore, it is important to use and analyze available data to provide better responses in the time to come.

- Description of source of data
  - Source data will be downloaded from the European Center for Disease Prevention and Control.

- Questions hope to be answered
  - Finding patterns, correlations or other interesting data points.

- Description of the data exploration phase of the project
  - First analysis with the data file was conducted in order to access if data can be used and in what way it can be used. Visual exploration was used to understand what the dataset consists of and the characteristics of the data available.

- Description of the data analysis phase of the project
  - The data will be analyzed further to extract more interesting data points and/ or patterns. First visualizations will be created to generate a cohesive story.

- Technologies used
  - Tableau Public and Jupyter Notebook.

- Results of the project
  - Due to time limitations project was not concluded, therefore no valid results can be presented.

- Recommendations for future analysis
  - Additional analyzes with different data set, since more and more data will be available.
